-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 10, 12-15, are rejected under 35 U.S.C. 102(b) as being anticipated by US 5770893 (Youlton).

Youlton discloses a wave energy converter comprising vessel 17, a plurality of chambers 14 having different lengths and draughts to optimize the performance of the wave energy device for different wave periodicity.

Regarding claims 2-5, note column 7, lines 47-55, for different types of sea anchors including shore based lines.

Claims 1-6, 10, 12-15, are rejected under 35 U.S.C. 102(b) as being anticipated by US 4123185 (Hagen et al).

Hagen et al discloses a wave energy converter comprising vessel 47, a plurality of chambers 20 having different lengths and draughts to optimize the performance of the wave energy device for different wave periodicity.

Regarding claim 2, note the flexible lines 15.

Regarding claims 3-5, note the anchors 16.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3748

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-9, 11, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 5770893 (Youlton). Youlton discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose different types of flow paths or energy extractor means. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to select different types of flow paths and energy extractors in Youlton for the purpose of achieving appropriate power outputs.
